CAP Town Hall: COVID-19 Impacts on Accredited Laboratories

**Overview of results for
State Pathology Society Presidents**

GoToWebinar Interface

Welcome

- **Opening Remarks**
 - CAP President Patrick Godbey, MD, FCAP
- **Survey Results**
 - Policy Roundtable Chair Thomas Wheeler, MD, FCAP
- **Questions and Answers**
 - President-elect Emily Volk, MD, FCAP
 - Council on Government and Professional Affairs Chair Jonathan Myles, MD, FCAP
 - Council on Scientific Affairs Chair Raouf Nakhleh, MD, FCAP
 - Council on Accreditation Chair Richard Scanlan, MD, FCAP

COVID-19 Impact Study

- **The CAP's survey for directors of CAP-accredited laboratories provides us with important data on the challenges of the COVID-19 pandemic.**
- **We will use this survey data to lobby for the resources your laboratories need.**
- **The CAP is fighting, and will keep fighting, for you during this challenging time!**

Patrick Godbey, MD, FCAP
CAP President

Key CAP Advocacy and Policy Activities

- **Advocate for Financial Assistance for Pathologists During the Pandemic**
- **Secure Regulatory Flexibility for Pathologists and Laboratories**
- **Influence Congress as it Acts on Providing Coverage, Payment, and Assistance to Physicians and Hospitals**
- **Collaborate with State Pathology Societies**

State Emergency Actions

- **Almost all states have received Section 1135 federal waivers allowing program flexibility in the administration of Medicare, Medicaid, and CHIP.**
- **Emergency declarations allow for interstate physicians and other professionals to practice.**
- **FDA has empowered states to determine whether a laboratory-developed test for COVID-19 administered at a high-complexity lab would meet emergency use authorization (EUA) criteria.**
 - **States may authorize testing without prior FDA approval for the duration of the emergency.**
 - **At present only CT, MD, MS, NV, NJ, NY, and WA are FDA approved for this purpose.**

Survey Objective, Methodology & Response Rate

- **Objective**

- To determine how the COVID-19 pandemic is impacting CAP accredited laboratories in the United States so CAP can better inform leaders, elected officials, and government regulators of the challenges laboratories are facing.
- To identify what laboratories need as they strive to deliver quality testing for the patient populations they serve.

- **Methodology**

- Target Audience: CAP Accredited Laboratories in the US
- Respondent Profile: Laboratory Directors in the US
- Study Format: Online study (3,784 invitations). Initial invitation sent on April 23, 2020 and study closed on April 30, 2020.

- **Response Rate**

- 11.5% response rate (434 unique responses)

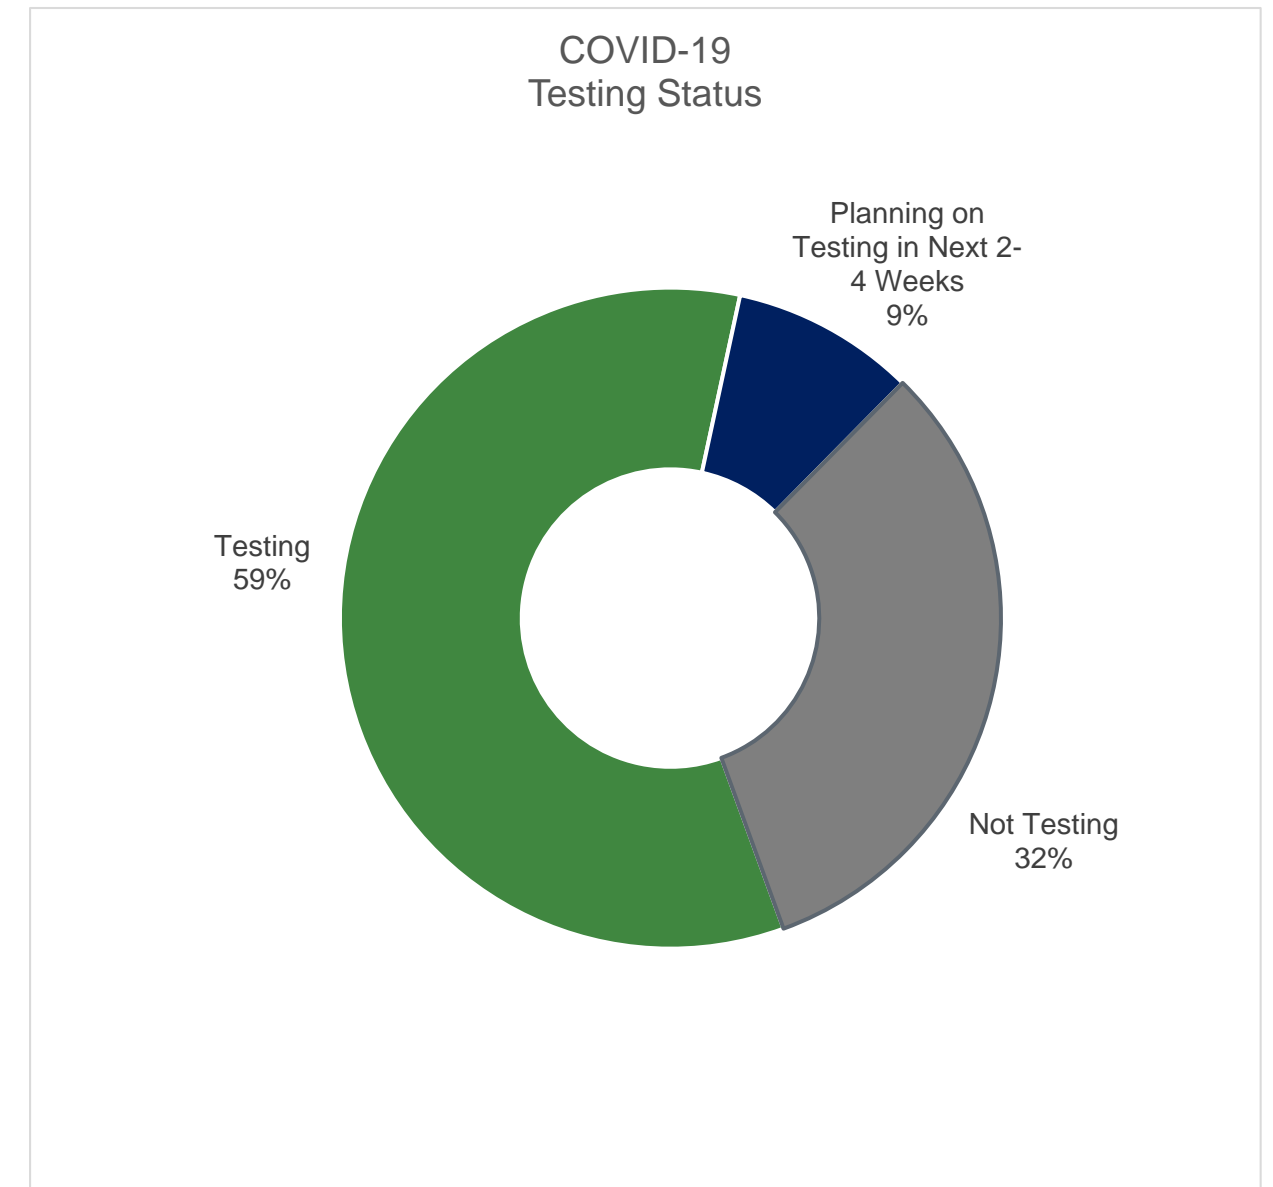

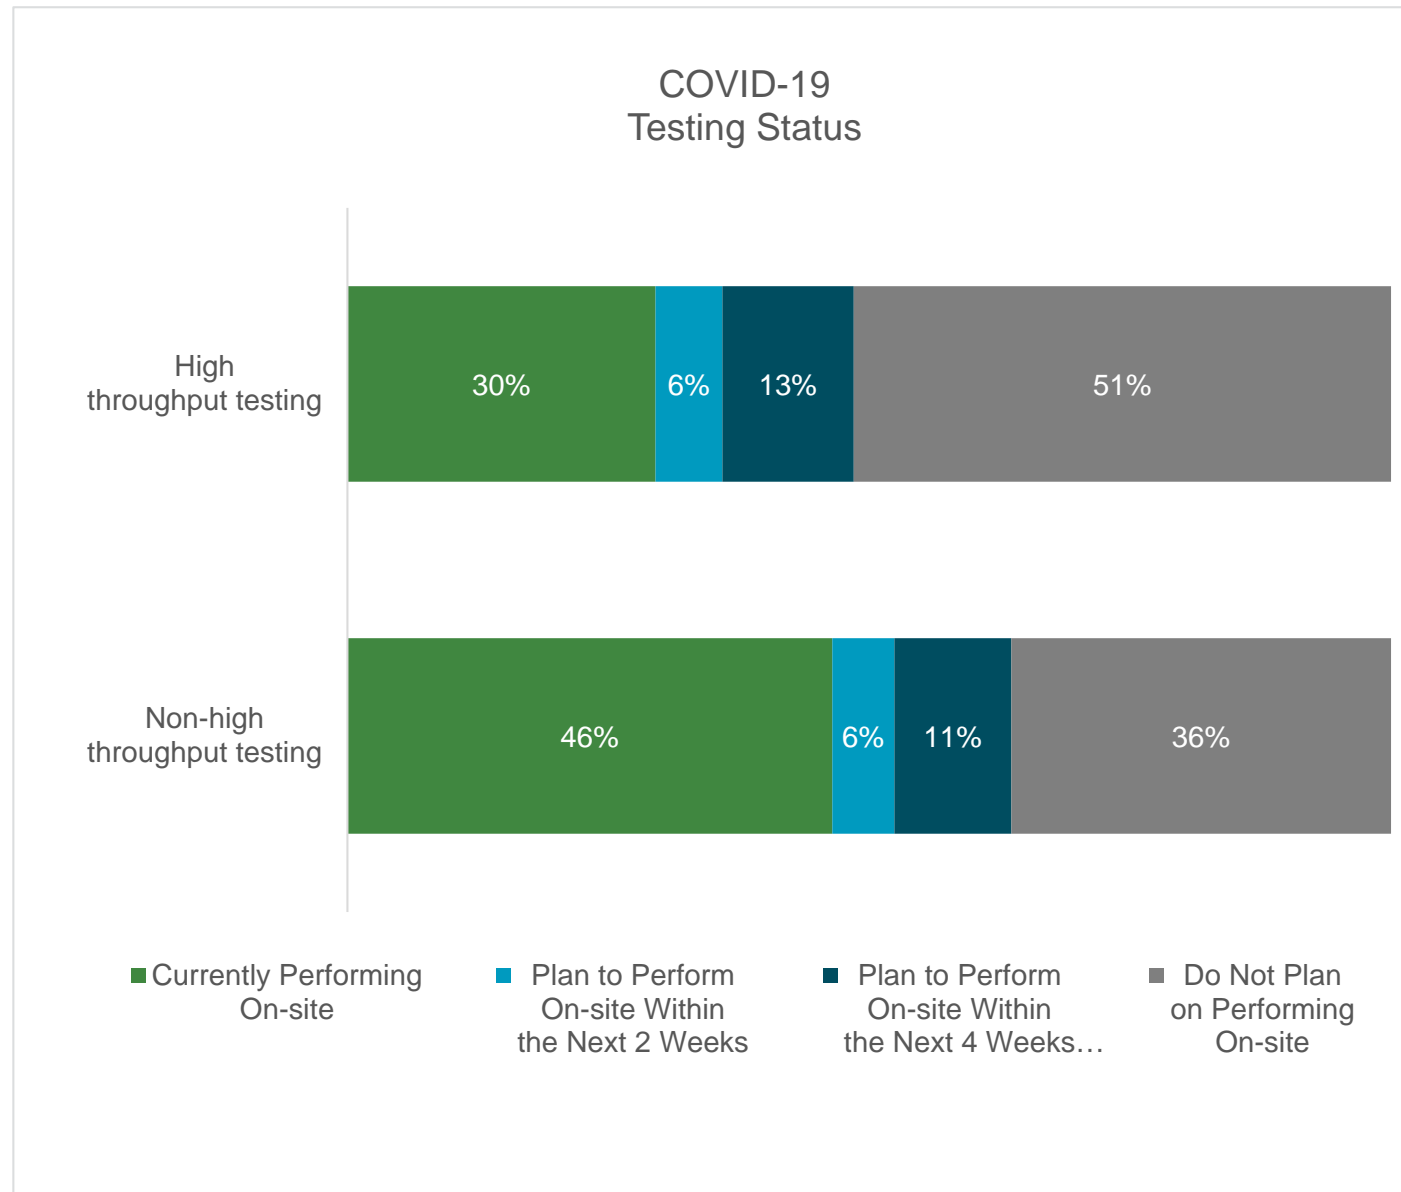

Thomas Wheeler, MD, FCAP
Chair, Policy Roundtable

COVID-19 Testing by Respondent Laboratory Directors

COVID-19 Testing by CAP-Accredited Laboratories

- **59% of responding CAP-accredited laboratories currently provide on-site COVID-19 testing, and another 9% of laboratories expect to provide testing with the next 2-4 weeks**
- **Since March 1, the number of responding laboratories offering COVID-19 testing has increased substantially**
- **Most laboratory directors that report that they have substantial excess capacity for providing COVID-19 testing**
- **Respondents expect their COVID-19 testing to increase by about 40% over the next two weeks**

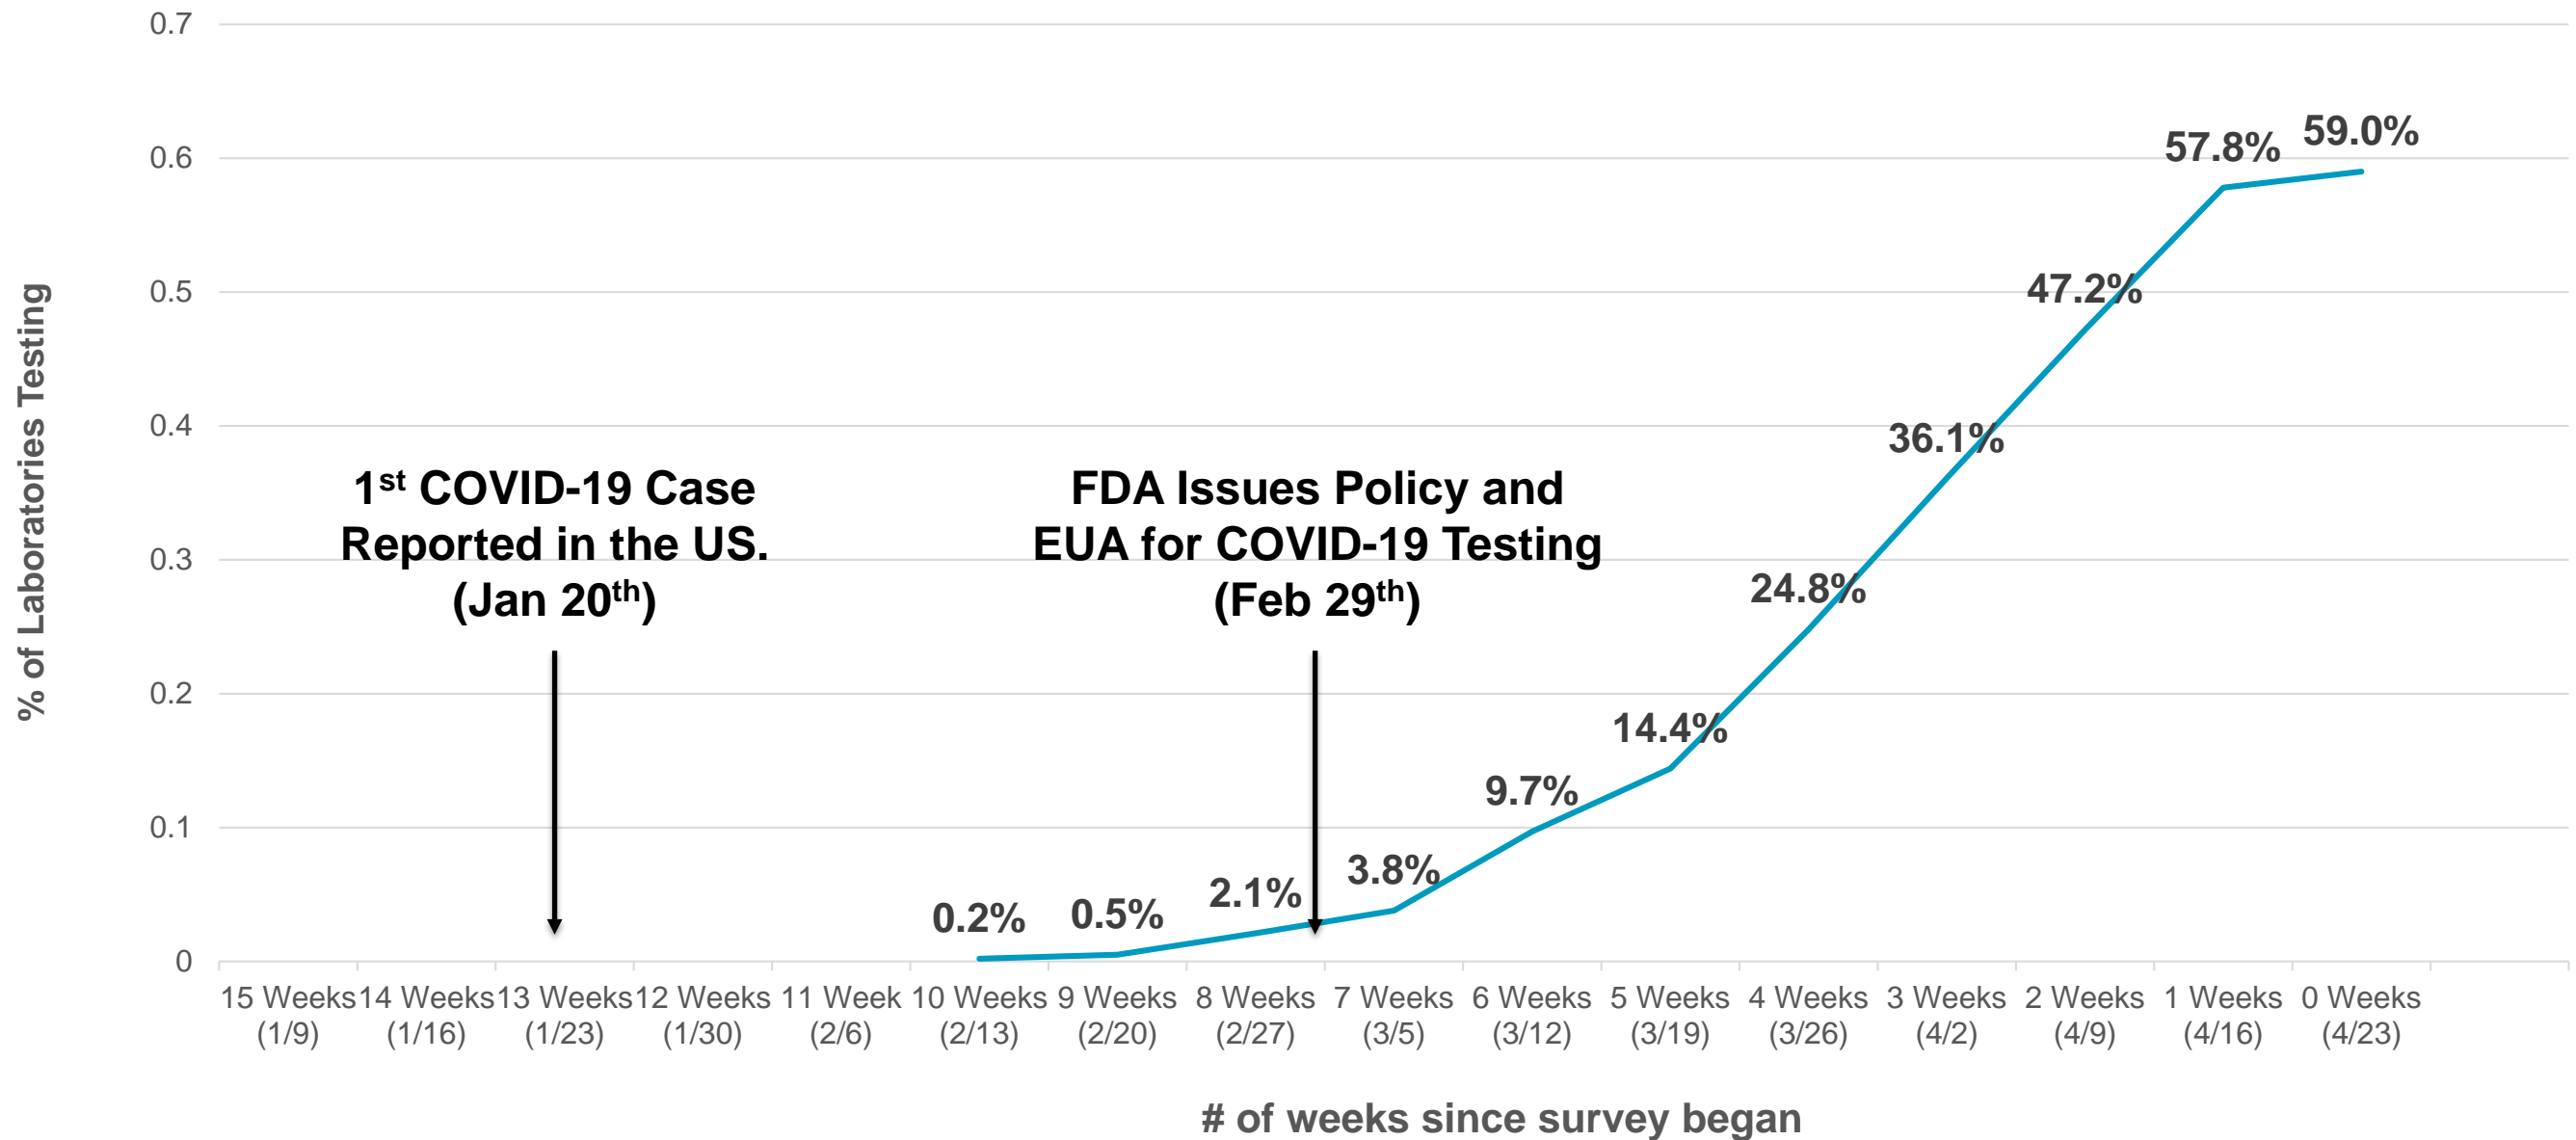

59% of Responding Laboratories Provide COVID-19 Testing—and 9% More are Working to Get Online Soon

Q Which of the following best describes your laboratory's COVID-19 testing status?

(n = 434)

Percent of Responding Laboratories Offering COVID-19 Testing, by Week

79% Of Responding Laboratories Report Having Excess Capacity For COVID-19

- **Current median daily test volume: 50**
- **Current average daily test volume: 211**

- **Median daily excess capacity: 78**
- **Average daily excess capacity: 302**

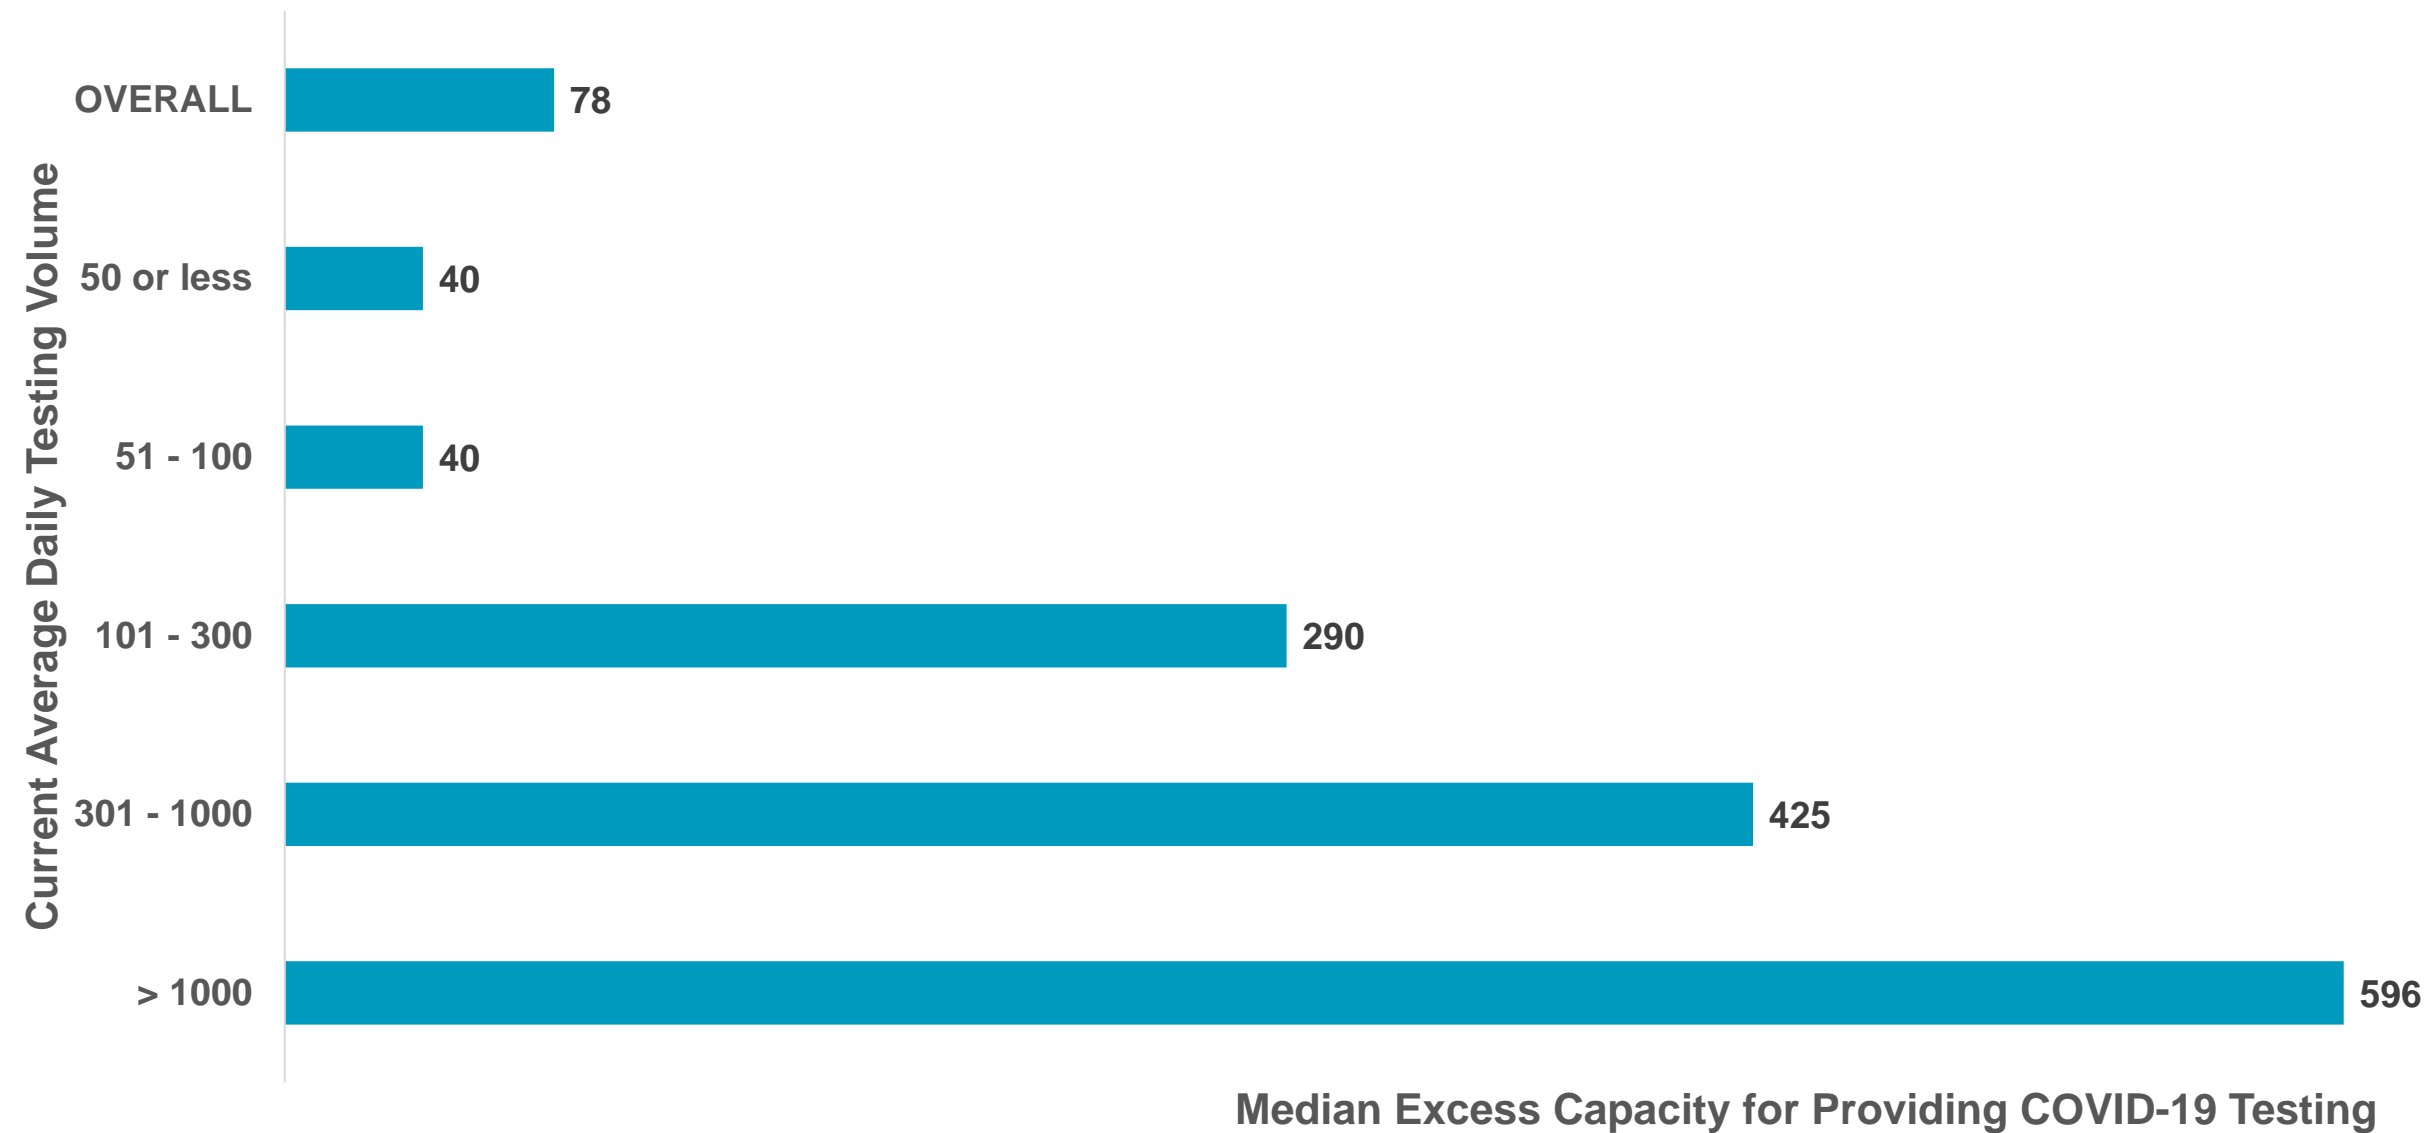

Q Using your best estimate...

a) What was the average daily COVID-19 test volume for the past 7 days?

b) What is your daily COVID-19 testing capacity? (ie, number of COVID-19 tests your laboratory is ^(n = 178)

ABLE to test daily)

Median Excess Capacity for Providing COVID-19 Testing, by Number of Tests Currently Provided per Day

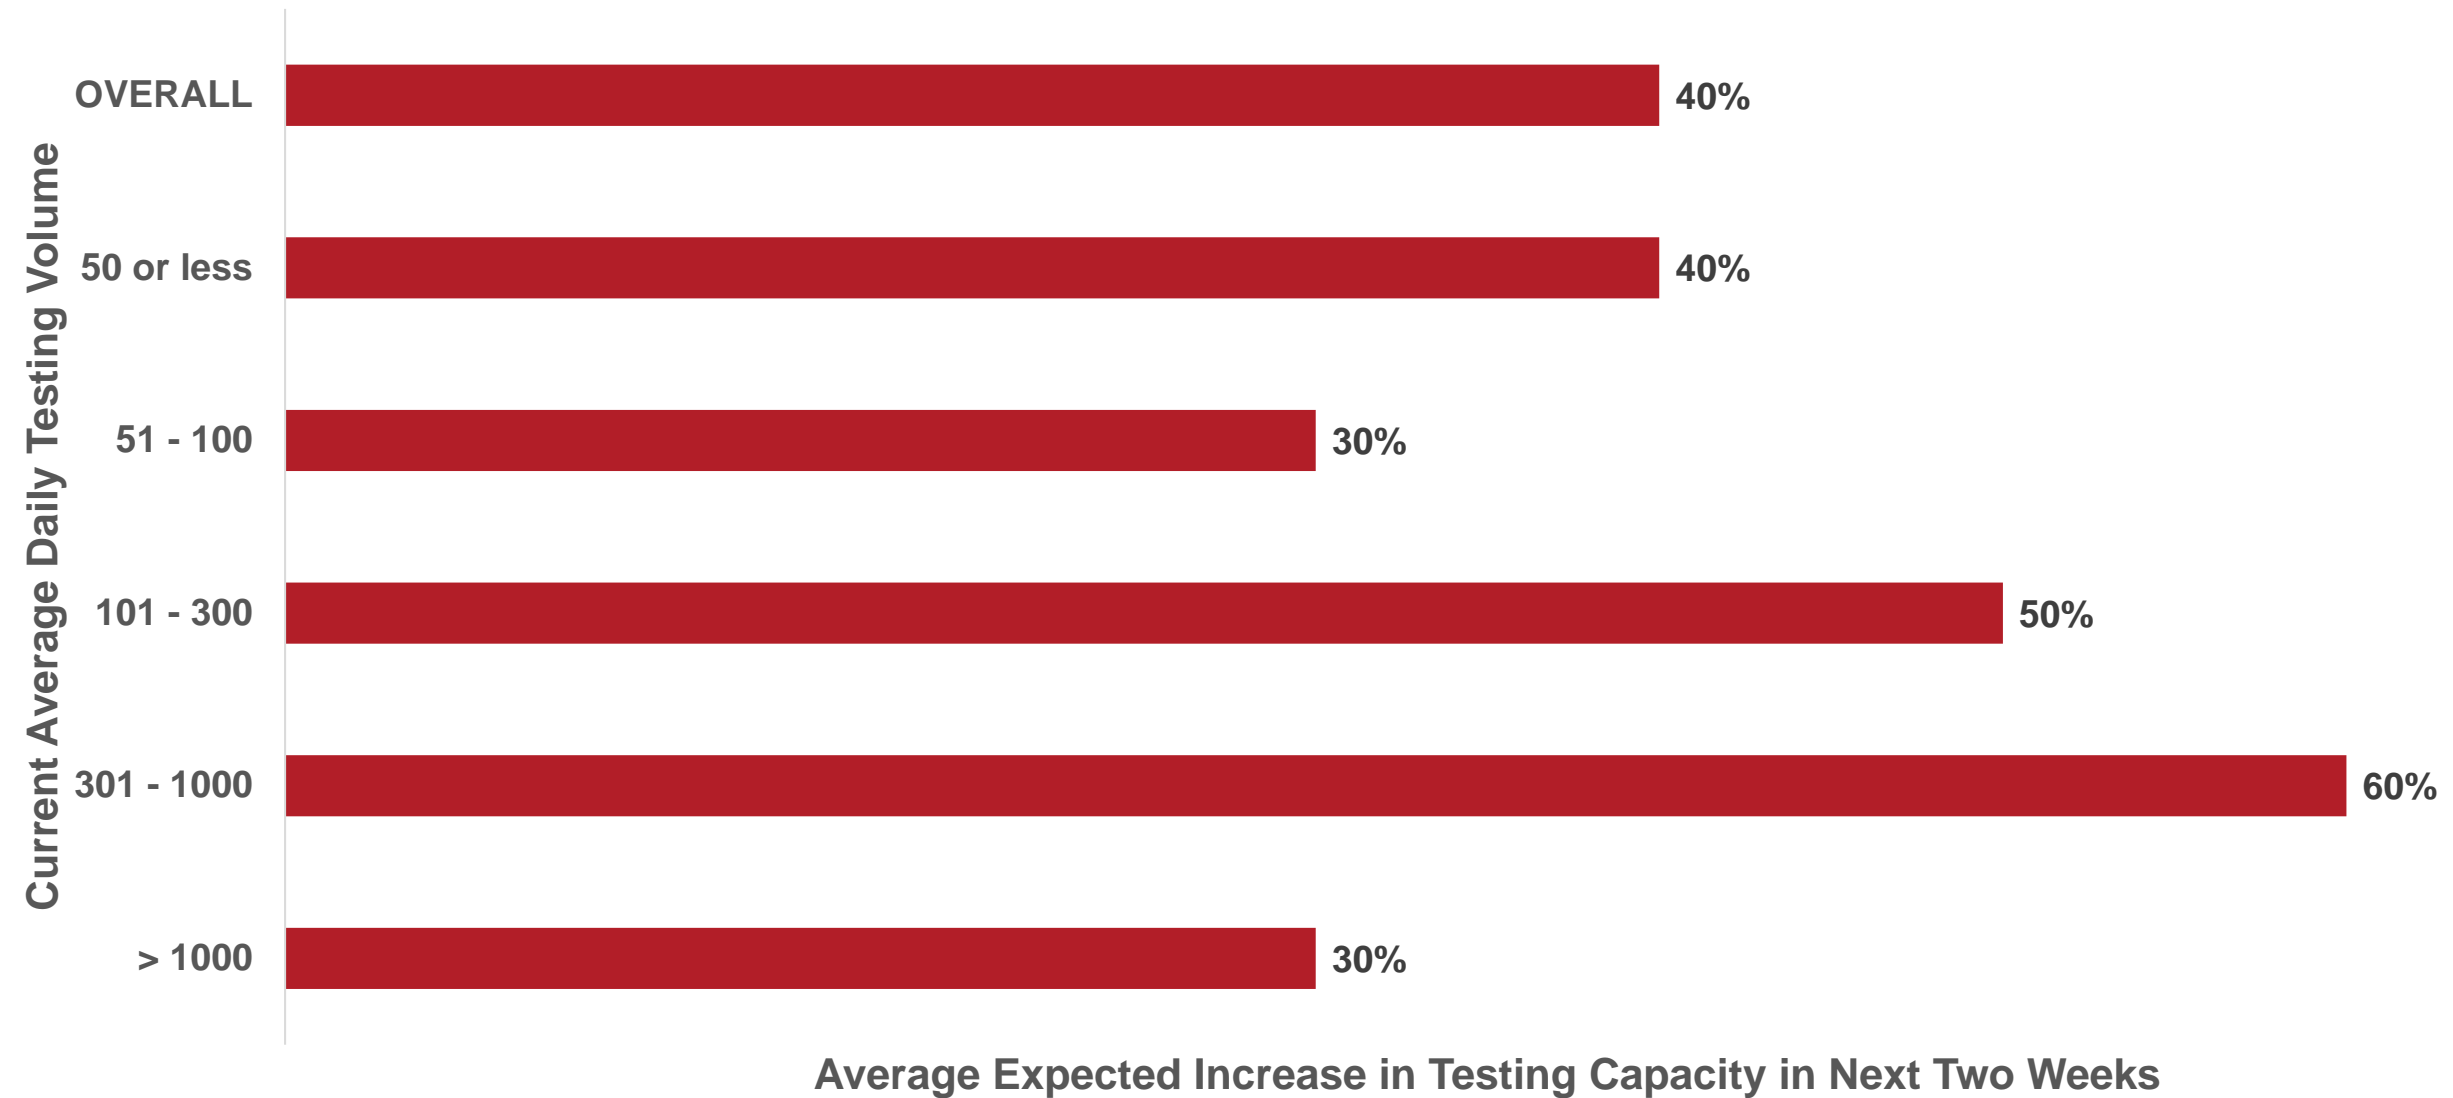

Q Using your best estimate...

a) What was the average daily COVID-19 test volume for the past 7 days?

b) What is your daily COVID-19 testing capacity? (ie, number of COVID-19 tests your laboratory is ABLE to test daily)

(n = 178)

Respondents Expect Their Testing to Increase by About 40% in Two Weeks

(Overall n = 216)

Impediments Reported By Responding Laboratory Directors

Impediments Reported by Laboratory Directors

- **Laboratory directors are reporting substantial barriers to getting the equipment needed for testing, particularly test kits, swabs, and transport media**
- **Laboratory workforces are facing substantial stresses, regardless of whether the laboratory is providing COVID-19 testing.**
- **Nearly all laboratories are reporting substantial losses in revenues and financial stress, but few have applied for federal assistance programs**

Items Most Frequently Cited as Most Difficult to Acquire for Performing Testing

Item	% citing as “difficult” or “very difficult”
Test kits for your instrument platform	69%
Flocked nasopharyngeal swab to collect and transport patient samples	66%
Viral transport media/universal transport media (VTM/UTM)	62%

Stresses Affecting the Laboratory Workforce

- **The COVID-19 pandemic is affecting pathologists and other laboratory professionals, regardless of whether the laboratory is providing COVID-19 testing.**
- **The top issues reported by laboratory directors among pathologists are reduced work hours (72%), reductions in pay (41%), increased burnout (21%), and increased work hours (20%).**
- **The top issues among non-pathologist laboratory professionals are reduced work hours (69%), reduced staff capacity (36%), temporary furloughs (34%), and increased burnout (31%).**

Financial Stresses On Laboratories

- Respondents report a median drop of 69% in AP testing and 46% in CP testing, regardless of whether they are doing COVID-19 testing.
- Average and median laboratory revenue have decreased by about 50% among all respondents, regardless of whether they provide COVID-19 testing.
- This adds substantial financial stresses to the laboratory. For those laboratories performing COVID-19 testing, it adds workload stresses to some pathologists and professional staff.
- While there are federal assistance programs that could help laboratories, only slightly more than half of laboratory directors were aware of these and **relatively few sought assistance or received benefits from these programs.**

Summary, and Questions and Answers

Survey Recap

- **Nearly 60% of respondents are currently providing COVID-19 testing.**
- **Many laboratories are reporting substantial excess capacity and are expecting to ramp up testing by about 40% in the next 2-4 weeks.**
- **Nevertheless, these laboratories are reporting difficulties in acquiring the supplies they need to test for COVID-19.**
- **There's no question that pathologists and laboratory professionals are under substantial amounts of pressure.**
