College of American Pathologists

2016 Election: I welcome your vote!

Having served in a variety of CAP leadership positions—expressly in the Laboratory Accreditation, membership and the House of Delegates, I know the College well. The issues below are where the CAP will need to focus:

CAP's leadership must create and advocate reasonable and alternative payment models in these changing times for healthcare.

CAP needs to manage its resources well to support member needs.

We are the central physicians in insuring quality, safety, value and lower cost throughout the health system.

No other specialty can do this.

We must make this known to our clinical colleagues.

I am a firm believer in working with State Societies to bring the CAP's value to the membership at large and am a member of Illinois, California, Texas and Florida Society of Pathologists. Pathologists are leaders in promoting healthcare quality by influencing standard setting and performance measurement. Through pathologists' native intelligence and curiosity, LAP and PT were begun and enhanced. We must now share this model of excellence to insure quality patient care.
