LaserTrack™ PH6 Cassette Printer

■ **Reliable, High Resolution Text & Barcodes**

Cassettes are printed using an innovative laser technology that creates the precise, clean edges and clear lines a barcode requires to produce a nearly perfect scan rate throughout the tracking process.

■ **Optimized Cassettes**

LaserTrack cassettes are specifically designed and optimized for use in LaserTrack cassette printers. This design results in effective movement within the instrument that reduces jamming and produces optimal scan rates of nearly 100%.

■ **Unsurpassed Print Speed**

The PH6 prints cassettes at a rate of one every three seconds. Six magazines hold up to 80 cassettes each, for a total of 480.

■ **Ancillary Consumables Eliminated**

The Phaser cassette is all that is required. Hot foil tape, lightbulbs, ink cartridges, printheads, and filters are not necessary.

■ **Compact Footprint**

With a small footprint and a large cassette capacity, this unit will allow labs to accommodate varying and expanding workflows.
