LaserTrack™ PH8 Cassette Printer

■ Reliable, High Resolution Text & Barcodes

Cassettes are printed using an innovative laser technology that creates the precise, clean edges and clear lines a barcode requires to produce a nearly perfect scan rate throughout the tracking process.

■ Optimized Cassettes

LaserTrack cassettes are specifically designed and optimized for use in LaserTrack cassette printers. This design results in effective movement within the instrument that reduces jamming and produces optimal scan rates of nearly 100%.

■ 1, 2, or 3-Sided Printing Technology

The LaserTrack PH8 is the **ONLY** cassette printer with the ability to print text and barcodes on one, two, or three sides of the cassette, allowing more information on the cassette. This unit is capable of meeting ever-changing data capture requirements and minimizing errors at the same time.

■ Ancillary Consumables Eliminated

The Phaser cassette is all that is required. Hot foil tape, light bulbs, ink cartridges, printheads, and filters are not necessary.
